Double check to see that your paragraph has 5 complete sentences: A topic sentence, three sentences with details that back up your topic sentence, and a concluding sentence that restates and reinforces your topic sentence!!!

Paragraph 1:

Paragraph 2

Paragraph 3

Plagiarizing Is Not Cool

Rules to Be Cool

1. The following MAY be copied:

a. **Proper nouns:** names, places, months, major historical events, etc. (These are nouns we capitalize.) For instance, The Great Depression is a historical event, so you don't have to change it.

However, if there is another way to say a major historical event, you can use it. The American Civil War is also known as the War Between the Blue and the Gray, or The War Between the States, and WWI is also known as The Great War, and the ironic, War to End All Wars. The bubonic plague, is sometimes referred to as the black death, etc.

b. Dates:

However there are ways of conveying the time period if you don't need an exact date:

"1492, when Columbus sailed the ocean blue," can be written as "The late 15th century when Columbus arrived in the Americas." (Yes, I know that doesn't rhyme ;o)

"WWII broke 1941." Can be written as "In the middle of the 20th century, WWII started."

You were born in the first quarter of the 21st century. See how, while you don't have to paraphrase dates, there are circumstances where you can.

c. Conjunctions: (Remember the mnemonic trick of the acronym "fanboys"-for-and-nor-but-or-yet-so)

There might be words you can replace them with, so try when you can. For example "and" can become "also," "in addition to," "plus," etc.. "But" could be written as "however," or "ins spite of."

d. Types of diseases and animals:

A cat is a cat, but there might be instances where you could say feline, but you wouldn't be plagiarizing if you used the word cat, but try as much as you can to find another word or phrase that means the same. You can paraphrase some animal names, but a rhinoceros is, well, a rhinoceros! I have never seen it referred to any other way. If the original text says someone has a cold, you could use the term cold, but could also say "rhinovirus" if you think your audience knows that is a medical term for the disease of a cold.

Everything else must be paraphrased-put in your words. The goal is to elicit the same understanding, imagery, and emotions in the reader, as the original text did.

Warning!!! Do not try and translate word for word into your words. It will produce awkward text. Look up words you don't know, so you understand the writer's meaning.

You can replace a single word with a synonym-(another single word,) or a phrase that means the same. For example, "tranquil" can be replaced with the synonym "calm," or the phrase "quiet and peaceful."

You, usually, do not have to include every detail from the original text, just information that is critical to the reader's understanding of the topic.

Check to make sure your paraphrase:

- Accurately reflects the meaning of the original text.
- Is in your words according to the rules.
- Uses your own phrasing or syntax-this falls into the warning not to translate word for word.
- Is not awkwardly written; follow standard grammar rules, and re-read it, looking for errors or awkwardness, and revise when necessary.

Here is an example of a paraphrasing of original text.

Original Text:

Bubonic plague is a zoonotic disease, circulating mainly in fleas on small rodents, and is one of three types of bacterial infections caused by Yersinia pestis (formerly known as Pastuerella pestis), that belongs to the family Enterobacteriaceae. Without treatment, the bubonic plague kills about two thirds of infected humans within four days.

The term bubonic plague is derived from the Greek word βουβών, meaning “groin.” Swollen lymph nodes (buboes) especially occur in the armpit and groin of persons suffering from bubonic plague. Bubonic plague was often used synonymously for plague, but refers specifically to an infection that enters through the skin and travels through the lymphatics, as is often seen in flea-borne infections.

Bubonic plague-along with the septicemic plague and pneumonic plague, which are the two other manifestations of Y. pestis-is commonly believed to be the cause of the Black Death that swept through Europe in the 14th century and killed an estimated 25 million people, or 30-60% of the European population.

Around the Mediterranean region, summers seemed to be the season when the disease took place. In northern Europe, the disease had its most frequent outbreaks in autumn. Because the plague killed so many of the working population, wages rose with the demand for labor. Some historians have seen this as a turning point in European economic development.

Below, is the same basic information I paraphrased- (said in a different way.)

The germ Yersinia pestis, which causes bubonic plague, comes from animals. Fleas bite rats and mice, and spread the disease to people. If people don't get medicine to treat it, bubonic plague is deadly, in less than a week, to more than half the people who contract it. Bubonic plague is a phrase from Greek- βουβών -“upper thigh,” because that is where much of the swelling is found, along with the area under people's arms.

The bubonic plague that ravaged Europe during the 1300s wiped out about half of the people. It was worse in warm months in the Mediterranean areas, but worse in the fall in the colder regions of Europe. A high number of workers died from the plague, so surviving workers received more pay. Many people studying the event feel it changed how Europe did business.

Activity:

On a separate piece of paper, paraphrase the following story, following the plagiarism “rules to be cool.”

“The Happy Monkey”

Once upon a time there was a sad little monkey. His name was Grafstdwhwh.

Grafstdwhwh felt extremely unhappy because no-one knew how to say his name.

“You're a weirdo!” the other monkeys would say. “Your name is silly!” even his own mother teased him! And, she gave him the name! Other monkeys like Gerry, Terry and Jerry loved to tease Grafstdwhwh, all the time.

Oh, life was tough for poor little Grafstdwhwh.

But, as time went by, little Grafstdwhwh grew bigger and bigger and BIGGER! Indeed, he grew so big, he was easily the biggest monkey in the entire jungle. And, he was certainly the strongest.

No-one ever dared to tease Grafstdwhwh anymore, and this made him VERY happy. Not even Gerry, Terry and Jerry dared ever come near Grafstdwhwh anymore! Whenever someone asked him how to say his name, Grafstdwhwh would say, It's easy. It's pronounced “Sir”!!!

And, do you know what? Everyone DID call Grafstdwhwh “Sir”!!!
